
Skills

Programming Language: PostgreSQL, Python, SAS

Data Analytics & Statistical Methods: Regression analysis, Hypothesis testing, Clustering, and Classification models

Data Processing & ETL: Tableau, Matplotlib, Seaborn

Database Management: SQL, Relational database

Big Data Tools: Pandas, Numpy

Experience

Data Scientist - Independent/Online Project

BATON ROUGE, LA June 2024 - Current

Coal Reclaimed Machine Maintenance Assessment

- Analyzed maintenance needs for five coal reclaimed machines at a coal terminal by identifying those exceeding idle capacity, utilizing Tableau to generate clear, data-driven insights.
- Conducted extensive data preparation to ensure accuracy, optimizing datasets for effective visualization and actionable insights on machine performance and maintenance requirements.
- Compiled findings into a comprehensive report for executive stakeholders, delivering targeted recommendations to support proactive maintenance decisions and operational efficiency.

Data Scientist - Internship, Stuller, Inc.

BATON ROUGE, LA Jan 2020 - May 2020

- Led data transformation of over 1.5 billion client records using SAS and Python, resolving technical issues to ensure accurate and actionable insights.
- Analyzed five years of sales data across 2,000+ product categories, identifying high-demand products and optimizing pricing strategies to drive profitability.
- Delivered executive dashboards and reports, translating complex data insights into strategic recommendations for senior leadership.
- Streamlined data processing workflows, reducing processing time by debugging, troubleshooting, and automating data cleaning processes.

Academic Research Assistant - Louisiana State University

BATON ROUGE, LA August 2017 - May 2020

- Reconciled bi-monthly revenue reports for over 900 students using Excel and SAS, ensuring data accuracy and maintaining financial accountability.
- Conducted benchmarking analyses on online course fees at peer institutions, providing actionable insights to inform pricing strategies and competitive positioning.
- Developed comprehensive three-year budget plans by analyzing financial data, forecasting future trends, and aligning projections with business objectives to support strategic decision-making.
- Assisted in academic research and lecture preparation for the LSUCIA director while supporting event planning and student recruitment to enhance operational efficiency and outreach.

Data Scientist - Internship, LSU Alumni Association

BATON ROUGE, LA May 2013 - March 2015

- Developed predictive models (regression, random forest, and k-means clustering) to forecast donor numbers, identify high-value contributions, and calculate average giving per donor, achieving a 92% churn prediction accuracy.
 - Managed ETL processes for 4M+ donor records in SQL Server, maintaining data integrity and ensuring stable data pipelines to support accurate analysis.
 - Analyzed five years of donation data to identify key trends and demographic insights, predicting a 10% increase in annual donations through targeted campaigns.
 - Created interactive Tableau dashboards to map donor regions and analyze trends, delivering actionable insights that improved targeted engagement and boosted fundraising effectiveness.
-

Education

Louisiana State University, Baton Rouge, LA

Master of Science in Analytics

May 2020, GPA 4.10

Master of Business Administration

May 2019, GPA 3.80

Minjiang University, Fuzhou, Fujian, China

Bachelor of Science in Finance

June 2012, GPA 3.44
